## Letter Opener Access B 400

### POWERFUL AND FAST – OPENS MAIL QUICKLY

You have more important work to be done than tediously open the daily mail by hand. Speed is not an issue for the Access B 400 letter opener. It can handle up to 400 letters per minute – up to 10 mm thick – without pre-sorting or fanning envelopes.

The Access B 400 letter opener handles all envelope sizes up to DIN C4/B4 from a single stack of mixed items. A sliding guide bar can be moved to three settings to make sure mail stays in position.

Slits instead of cuts. The Access B 400 slits the envelope open instead of cutting off an edge. The advantages – letter contents cannot be damaged and there are no envelope cuttings to collect.

The B 400 also features a convenient ON/OFF function. Automatically starts work as soon as envelopes are loaded, and then shuts off when the last envelope is finished. An automatic return provides optimal protection for letter contents in case of a paper jam.

### TECHNICAL SPECIFICATIONS

#### Features

Automatically opens letters stacked up to 800 mm high
